Professional Summary

I am an experienced Software Engineer with over 3 years in IT, specializing in developing and implementing software applications using PHP and Laravel. I am proficient in delivering high-quality solutions that enhance user experience and operational efficiency. My background includes hands-on experience in back-end development, a strong ability to collaborate effectively within teams, and expertise in optimizing code for best practices to ensure robust and scalable solutions.

Employment History

Software Engineer, Chetu, Noida

06/2023 - 12/2024

Executed web development projects as a Software Engineer. Developed applications in alignment with coding standards, debugging, and collaborating with cross-functional teams to deliver high-quality software. I primarily use technologies like PHP, Laravel, JavaScript, and REST APIs, along with tools like Git. I also ensure code optimization and maintain best practices in coding standards.

PHP Developer, Zest Geek Solutions, Mohali

01/2022 - 06/2023

Gained hands-on experience in back-end development using PHP, WordPress, and Bubble.io, focusing on building user-friendly interfaces, implementing effective data management strategies, and deploying scalable web applications. Worked extensively with WordPress to develop dynamic websites and themes, while leveraging Bubble.io to create no-code applications, enhancing technical expertise in both platforms. Delivered impactful, real-world solutions that meet user needs and drive operational efficiency.

Junior PHP Developer , Nexavar Software Solutions, Mohali

07/2021 - 12/2021

Created an e-commerce platform called Gadgets Hunts using PHP. Developed a comprehensive admin panel for managing product listings and orders within the Gadgets Hunts website. Integrated a secure payment gateway using PayPal API keys, enabling seamless online transactions for gadget purchases.

Education

Bachelors of Technology, IK Gujral Punjab Technical University, Punjab

01/2018 - 01/2022

Information Science And Engineering

Class XII, Model Multiple College, Nepal

01/2016 - 01/2018

PCM

Class X, St. Xavier's High School, Nepal

03/2015 - 03/2016

General

Projects

Physician Connects, Laravel

Hobbies

- Basketball
- Photography
- Building Personal Projects
- Traveling

Languages

English	
Hindi	
Nepali	

01/2022 - 06/2022

Developed a comprehensive office management program that connects physicians, pharmacies, insurance providers, and patients. Developed a secure physician portal in Laravel for Physician Connects, allowing physicians to view patient appointments using a user-friendly JS calendar. Developed an admin panel within Physician Connects office management program for physicians to efficiently manage patient appointments.

Restoration Sash And Door, Laravel, MySQL

07/2022 - 12/2022

Developed a dynamic product configuration platform: Leveraged Laravel's robust framework to create an intuitive interface allowing users to customize window and door specifications, generating real-time 3D models and cost estimates. Implemented a secure and efficient order management system: Utilized Laravel's features to manage the entire order lifecycle, including partial payment processing, production scheduling, and delivery tracking. Integrated a user-friendly dashboard: Built a personalized dashboard for customers to monitor order status, make payments, and access product information, enhancing the overall user experience.

Gadgets Hunts, PHP, HTML, CSS, MySQL

01/2021 - 06/2021

Developed a robust admin panel leveraging PHP to manage product listings and order processing within Gadgets Hunts, ensuring efficient e-commerce operations. Built a comprehensive e-commerce website (Gadgets Hunts) from scratch using PHP, encompassing both server-side and user-facing functionalities. Integrated a secure payment gateway utilizing PayPal within Gadgets Hunts, enabling seamless online transactions for gadget purchases.

CuteEnglishTeacher.ai, WordPress

01/2023 - 05/2023

Enhanced student engagement on CuteEnglishTeacher.ai (WordPress) by integrating DeepBrain.ai's AI script, allowing students to utilize AI-powered learning features. Implemented a secure One-Time Password (OTP) verification system for CuteEnglishTeacher.ai, safeguarding student accounts and ensuring responsible AI access. Developed a dynamic 10-minute timer using JavaScript for CuteEnglishTeacher.ai.

Wish Sponsor, WordPress

07/2023 - 11/2023

Developed a custom WooCommerce theme for Wish Sponsor to facilitate interactions between influencers and their fans. Created personalized influencer profile pages allowing influencers to showcase their wishes and receive donations from fans. Implemented a secure payment gateway to process donations from fans and facilitate the delivery of gifts to influencers.

RoyalTruckEquipment-SCM, WordPress

12/2023 - 03/2024

Built a comprehensive online platform using WordPress and Elementor to showcase a wide range of truck models, including detailed specifications, high-quality images, and informative videos. Implemented a user-friendly navigation system to allow visitors to easily filter and search for trucks based on their specific needs. Integrated a powerful search functionality to enable quick and efficient product discovery.
