Professional Summary

I am an experienced Software Engineer with over 3 years in IT, specializing in developing and implementing software applications using PHP, Laravel, HTML, CSS, JavaScript, MySQL and Python(Core). Proficient in version control and collaboration using GitHub, with a strong focus on delivering high-quality solutions that enhance user experience and operational efficiency. My background includes hands-on experience in back-end development, strong collaboration skills, and the ability to optimize code for performance and follow best practices.

Employment History

Software Engineer, LTIMindtree, Noida

01/2025 - Present

Working on a large-scale internal application with a focus on implementing new features, resolving bugs, and ensuring smooth functionality across interconnected modules. Collaborated closely with cross-functional teams to uphold clean code practices and deliver maintainable, scalable software. Involved in the usage of the MVC pattern, OOP principles, and SQL databases, along with tasks like CSV generation and data handling. Used Git for version control and team collaboration, and consistently optimize code for performance while following best practices to enhance overall development quality.

Software Engineer, Chetu, Noida

06/2023 - 11/2024

Executed web development projects as a Software Engineer. Developed applications in alignment with coding standards, debugging, and collaborating with cross-functional teams to deliver high-quality software. I primarily use technologies like PHP, Laravel, JavaScript, and REST APIs, along with tools like Git. I also ensure code optimization and maintain best practices in coding standards.

PHP Developer, Zest Geek Solutions, Mohali

05/2022 - 05/2023

Gained hands-on experience in back-end development using PHP, WordPress, and Bubble.io, focusing on building user-friendly interfaces, implementing effective data management strategies, and deploying scalable web applications. Enhanced technical expertise and the ability to deliver impactful, real-world solutions that meet user needs.

Education

Bachelors of Technology, IK Gujral Punjab Technical University, Punjab

01/2018 - 04/2022

Class XII, Model Multiple College, Nepal

01/2016 - 01/2018

Class X, St. Xavier's High School, Nepal

03/2015 - 03/2016

Projects

JustCloud, PHP,Jquery,Mysql,Cassandra,GCP

01/2025 - Present

JDI Backup is a cross-platform application that simplifies file protection. It offers cloud storage, automatic backups, multi-device syncing, and secure file sharing. With robust encryption and an easy-to-use interface, JDI Backup keeps your photos, documents, and files safe anywhere, anytime. Supports multi-brand, multi-country customer data management system using a monorepo architecture. Ensures data accuracy, scalable storage, and maintainable backend code across multiple brands and regions.

PHYSICIAN CONNECTS, Laravel,JavaScript,HTML,CSS

01/2022 - 06/2022

Developed a comprehensive office management program that connects physicians, pharmacies, insurance providers, and patients. Developed a secure physician portal in Laravel for Physician Connects, allowing physicians to view patient appointments using a user-friendly JS calendar. Developed an admin panel within the Physician Connects office management program for physicians to efficiently manage patient appointments.

CuteEnglishTeacher.ai, WordPress,JavaScript

01/2023 - 05/2023

Enhanced student engagement on CuteEnglishTeacher.ai (WordPress) by integrating DeepBrain.ai's AI script, allowing students to utilize AI-powered learning features. Implemented a secure One-Time Password (OTP) verification system for CuteEnglishTeacher.ai, safeguarding student accounts and ensuring responsible AI access. Developed a dynamic 10-minute timer using JavaScript for CuteEnglishTeacher.ai.

Wish Sponsor, WordPress

07/2023 - 11/2023

Developed a custom WooCommerce theme for Wish Sponsor to facilitate interactions between influencers and their fans. Created personalized influencer profile pages allowing influencers to showcase their wishes and receive donations from fans. Implemented a secure payment gateway to process donations from fans and facilitate the delivery of gifts to influencers.

Restoration Sash And Door, Laravel, MySQL

07/2022 - 12/2022

Used Laravel's robust framework to customize window and door specifications, generating real-time 3D models and cost estimates.Managed the entire order lifecycle, including partial payment processing, production scheduling, and delivery tracking.

RoyalTruckEquipment-SCM, WordPress

12/2023 - 03/2024

Developed an online platform using WordPress and Elementor to showcase truck models with specs, images, and videos. Implemented intuitive navigation and advanced search for efficient product discovery.
